# USED TIRE

# MANAGEMENT PROGRAM

## Keeping Tires Out of Our Landfills

Every year, MMSB's Used Tire Management Program keeps 500,000 tires out of landfills, which helps to:

- Extend the life of landfills
- Protect the natural landscape
- Conserve natural resources

All highway vehicle tires, rim size 24.5 inches or less, have been banned from landfills since 2002.

## Environmental Fee

When a new highway tire is purchased in Newfoundland and Labrador, a one-time environmental fee is applied, based on the diameter of the tire rim. Retailers submit the fee to support the cost of the program.

**\$3.00/tire**

17 inches or less

**\$9.00/tire**

greater than 17 inches and equal to or less than 24.5 inches

# HOW THE PROGRAM WORKS

## Return to Retailer

Return up to four used tires at one time to any tire retailer in the province, at no additional charge. Contact your retailer to confirm business hours for tire drop off.

## Accepted Tires

Passenger and light truck tires

Motorcycle tires

Camper tires

Trailer tires

Transport, bus, semi-trailer & dump truck tires

Used tires must be off the rim, free of mud and debris, and in whole form (tire fragments are not accepted).

Tires for off-the-road (OTR) vehicles such as dirt bikes, all-terrain vehicles (ATV), forklifts, farm machinery and non-highway construction equipment are not accepted. Tires with a rim diameter greater than 24.5 inches also are **not included in the program**.

Contact your regional waste management authority or municipality for information on proper disposal of non-program tires.
